

DecNullCheckTargetOrderFood
Staff.OnConditionCheck

DecoCheckStateStaff.OnCondition
Check

BaseStaffDecorator.GetStaffData

```
graph LR; A[DecNullCheckTargetOrderFoodStaff.OnConditionCheck] --> C[BaseStaffDecorator.GetStaffData]; B[DecoCheckStateStaff.OnConditionCheck] --> C;
```

The diagram illustrates a decorator pattern. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'DecNullCheckTargetOrderFood' on the first line and 'Staff.OnConditionCheck' on the second line. The bottom box contains 'DecoCheckStateStaff.OnCondition' on the first line and 'Check' on the second line. On the right, there is a gray rectangular box with a black border containing the text 'BaseStaffDecorator.GetStaffData'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both decorators inherit from or delegate to the base decorator's 'GetStaffData' method.
