

BaseDoTweenUI.Start

```
graph LR; A[BaseDoTweenUI.Start] --> B[BaseDoTweenUI.OnInitialize]; A --> C[BaseDoTweenUI.StartDoTween];
```

The diagram illustrates a branching logic flow. A single source node, 'BaseDoTweenUI.Start', is shown in a grey box on the left. Two blue arrows originate from its right side, pointing to two separate destination nodes on the right. The top destination node is 'BaseDoTweenUI.OnInitialize' and the bottom one is 'BaseDoTweenUI.StartDoTween'. Both destination nodes are white with black borders.

BaseDoTweenUI.OnInitialize

BaseDoTweenUI.StartDoTween
