

Variable< LotteryData >

```
classDiagram
    class Variable["Variable< LotteryData >"]
    class LotteryDataVariable
    Variable <|-- LotteryDataVariable
```

The diagram illustrates a class hierarchy. At the top is a white box representing the superclass 'Variable< LotteryData >', which contains two empty slots. Below it is a gray box representing the subclass 'LotteryDataVariable', which also contains two empty slots. A blue arrow with an open triangular head points from the top of the 'LotteryDataVariable' box to the bottom of the 'Variable< LotteryData >' box, indicating that 'LotteryDataVariable' inherits from 'Variable< LotteryData >'.
